

Board of Management

Agreed Report

14 June 2017

1. One member of staff continued to be on long term sick leave and another recently returned and she is expected to start parental leave in September until the end of January. The majority of the consequent teaching hours not covered can be taught by existing staff.
2. The building has had a complete survey by SEAI and a list of 10 priority actions has been received (circulated at the meeting). The works have started and the age of the building has been the limiting factor in making cost efficient savings on energy. All efforts will continue and suggestions from members on solar panels for water and external cladding insulation will be followed up. Members were asked to be alert to other organisations in Tubbercurry who might be considering energy saving work with whom we could collaborate for any available grants.
3. We had a successful day at the NW Careerfest in Sligo IT recently and this and other efforts have resulted in a steady flow of applications for September.
4. Staff members reached the finals of the MSLETB Awards recently and congratulations were extended. Members asked to be informed of future awards events organised by MSLETB.
5. Risk Assessment is being carried out in the college- a long term exercise on which we have made a start.
6. Examinations are now finished and all results will have been sent out by the end of this week. Further interviews will take place this week and an open day will be held on 1 September.
7. Work to network with local organisations and raise the profile of the college with local employers continues.
8. VTOS attendance is 85 %
